PROFESSIONAL SUMMARY

Full Stack Developer with 7+ years of experience owning end-to-end features, from building **React.js-based** user interfaces to architecting scalable **Laravel + Livewire backends** for ERP, HR, and FinTech-style platforms across the UAE, KSA, and Egypt. Strong focus on interactive dashboards, data-driven UIs, and frontend performance optimization **using React, Livewire, and Alpine.js**, collaborating closely with product and backend teams to ship features from idea to production.

EMPLOYMENT HISTORY

Full Stack Developer (Acting as Lead), 12/2024 - 11/2025

Royal Class Group - Dubai, UAE

- **Owned the full SDLC end-to-end** (architecture → coding → testing → deployments/monitoring) for a multi-module ERP (CRM, HR/Payroll, Accounting, Stock, LMS) built on Laravel with **Livewire components and Alpine.js-driven interactivity**.
- Raised engineering quality: led code reviews and standards (SOLID/Clean Architecture) across both the Laravel + **Livewire/Alpine.js layers**; improved API robustness (idempotency, rate-limiting) and boosted reliability/performance across core modules.

Full-Stack Developer (Team lead), 12/2022 - 10/2024

SAG Tech - Jeddah, Saudi Arabia

- **Contributed to product and design:** translated requirements into user flows and wireframes, clarified UX, and aligned component behavior with the design team to ship features on time.
- **HR platform (5,000+ employees):** built and maintained Laravel + **Livewire/Alpine.js** modules for internal dashboards, forms, and admin workflows, enforcing secure coding, RBAC, and audit trails.
- **Saudi digital wallet:** implemented a **React.js-based dashboard and front-facing UI using Inertia.js** on top of Laravel, building reusable React components (tables, filters, modals, and summary cards) to speed up development; introduced CI/CD and performance tuning (Redis, query optimization) to improve reliability and response times.

Backend / Full-Stack Developer, 07/2021 - 11/2022

Angazny - Cairo, Egypt

- Built B2B integrations with **EasyOrder** and **Taager** to sync products and orders.
- Designed scalable APIs supporting thousands of daily transactions.
- Improved reliability and reduced API response times for e-commerce platform.

Backend / Full-Stack Developer, 01/2021 - 06/2021

ElkenanyGroup - Cairo, Egypt

- Developed real-time commodity price updates via **Pusher** with Laravel.
- Created the **Intela Dashboard** for efficient internal operations management.

Backend / Full-Stack Developer, 06/2019 - 12/2020

Matrix clouds - Cairo, Egypt

- Delivered web applications (e-commerce, LMS, car rental) from scratch with Laravel/MySQL.
- Reduced page load time and optimized queries for scalability.

Backend Developer, 06/2018 - 05/2019

Eraa Soft - Cairo, Egypt

- Contributed to LMS features (student & course management).
- Maintained company websites using PHP, Laravel, and Bootstrap.

SKILLS

- **Frontend:** React.js, Livewire, Alpine.js, Next.js (SSR/ISR/CSR), state management, component-driven development
- **UI Frameworks:** Tailwind CSS, Bootstrap, shadcn/ui (React)
- **Backend:** PHP/Laravel (11/12), RESTful services, background jobs/queues, Redis caching, performance tuning, SQL optimization
- **APIs & Architecture:** REST design, versioning, idempotency, rate-limiting, OAuth/JWT; SOLID, Clean Architecture; secure coding (OWASP)
- **Version Control & CI/CD:** Git, GitHub (PR reviews), AWS CodeCommit; pipelines with test gates, containerized builds (Docker)
- **Cloud & Databases:** AWS (EC2, S3), MySQL, PostgreSQL; schema design, indexing, migrations, views, stored procedures, functions

EDUCATION

Bachelor of Commerce: Accounting

Cairo University

PERSONAL DETAILS

Nationality: Egypt

Marital status: Single
